

**CALIBRE MINING ADVANCES THE HIGH-GRADE PAVON CENTRAL OPEN PIT MINE DEVELOPMENT
AND ANNOUNCES EXPANSION DRILL RESULTS**

March 22, 2022 News Release Drill Hole Table

| Mine Site | Drill Hole ID | Vein Structure | From (m) | To (m) | Interval (m) | ETW (m) | Au (g/t) | Ag (g/t) |
|-----------|---------------|----------------|----------|--------|--------------|---------|----------|----------|
| Pavon | PVC-21-041 | Pavon Central | 52.9 | 53.9 | 1.1 | 0.6 | 1.91 | 0.4 |
| Pavon | PVC-21-043 | Pavon Central | 118.6 | 120.5 | 1.9 | 1.4 | 5.98 | 12.0 |
| Pavon | PVC-21-044 | Pavon Central | 115.9 | 118.9 | 3.0 | 2.3 | 2.66 | 3.1 |

Additional drillholes from the 2021 drilling program did not contain significant values of gold and are not included in this compilation of gold composite values. The low grade drillholes are included in the long sections provided in the presented figures and all drill holes will be included in the 2021 Libertad Technical Report following the Feb 23, 2022, News Release titled, Calibre Increases Nicaraguan Mineral Reserves to In Excess of 1 Million ounces of Gold; A 254% Increase, Net of Production Depletion, Since Acquisition in Q4, 2019

Estimated True Widths ('ETW') for reported vein intercepts are based on empirical 3D models of the individual veins. Estimates are determined in cross-section using two methods to cross-check values. The

*calculated method uses the formula ETW= L * sin A * sin B, ETW is the estimated true width, L is the length of the mineralized core interval, A is the angle between the core axis and the vein, and B is the angle of the azimuth of the vein strike to the azimuth of the drillhole. The second, less precise, method is a simple measurement of the modelled vein thickness perpendicular to the vein margins through the midpoint of the drill hole intercept. Percentage based differences between individual ETW's and down-hole interval lengths will vary between drill holes depending on drill hole inclination, variations in vein strike and dip, and overall geometries of the different vein systems.*
